Addends and Sums

You can add numbers
this way

$$5 + 3 = 8$$

addend + addend = sum

or this way.

3	addend
+5	+ addend
8	sum

Numbers that you add are called **addends**.

The answer that you get when you add is called the **sum**.

Which of these are **addends**?

1. $3 + 4 = 7$ 2. $6 + 2 = 8$

$$\begin{array}{r} 3. \quad 6 \\ +1 \\ \hline 7 \end{array}$$

$$\begin{array}{r} 4. \quad 4 \\ +4 \\ \hline 8 \end{array}$$

Copy and add. Circle the **addends**.

BRAINTICKLER

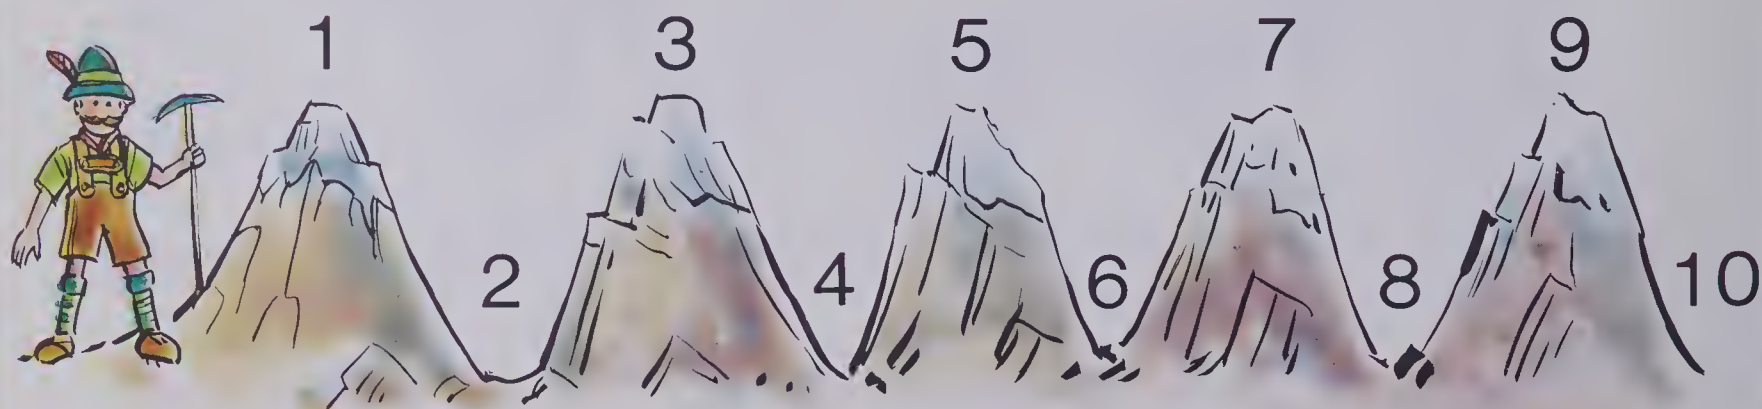

Place these numbers in circles:

1, 2, 3, 4, 5, 6.

Make each side of the shape add up to 10.

Odds and Evens

The numbers at the mountain tops are **odd numbers**.

The numbers in the valleys are **even numbers**.

1. Write the **odd numbers**.

2. Write the **even numbers**.

3. Name each “odd” or “even”.

5 — odd	3	8	4	2
6	9	7	10	1

★4. How are you counting if you use only the **even** numbers?
odd numbers?

★5. Draw a long line of mountains and valleys.
Write odd and even numbers as far as you can.
What numbers are used over and over again?

Subtraction Stories

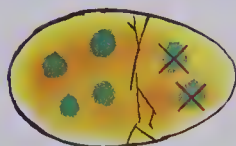

How many birds altogether?
How many birds are flying away?
How many birds are left?

$$5 - 2 = \blacksquare$$

The number of birds that are left is called the **difference**.

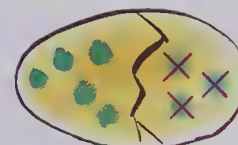

Subtract to find the difference.

1.

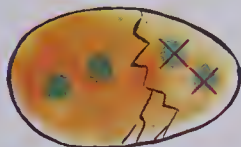

$$6 - 2 = \blacksquare$$

2.

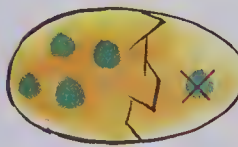

$$8 - 3 = \blacksquare$$

3.

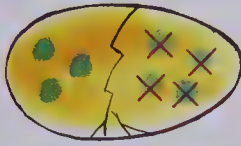

$$4 - 2 = \blacksquare$$

4.

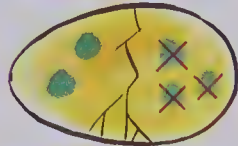

$$5 - 1 = \blacksquare$$

5.

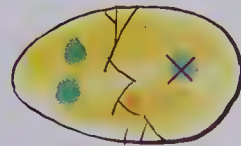

$$7 - 4 = \blacksquare$$

6.

$$5 - 3 = \blacksquare$$

7.

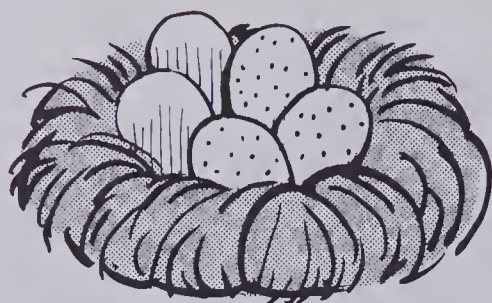

$$3 - 1 = \blacksquare$$

8.

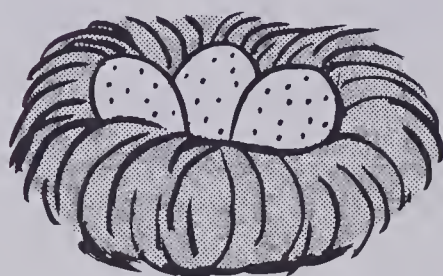

$$6 - 3 = \blacksquare$$

3, 2, and 5

$$\begin{array}{r} 3 \text{ speckled eggs} \\ + 2 \text{ white eggs} \\ \hline 5 \text{ eggs altogether} \end{array}$$

$$\begin{array}{r} 5 \text{ eggs altogether} \\ - 2 \text{ eggs are taken away} \\ \hline 3 \text{ eggs are left} \end{array}$$

You can make 4 number stories that go with these numbers.

$$3 + 2 = 5$$

$$5 - 2 = 3$$

$$2 + 3 = 5$$

$$5 - 3 = 2$$

Make 4 number stories for each of these.

1. 1, 2, 3

$$1 + 2 = \blacksquare$$

$$2 + 1 = \blacksquare$$

$$3 - 2 = \blacksquare$$

$$3 - 1 = \blacksquare$$

2. 2, 8, 10

$$2 + 8 = \blacksquare$$

$$8 + 2 = \blacksquare$$

$$10 - 8 = \blacksquare$$

$$10 - 2 = \blacksquare$$

3. 5, 2, 7

5. 2, 4, 6

6. 6, 3, 9

7. 5, 1, 4

Addition and Subtraction

Measurement: Centimetres and Metres

The Centimetre (cm)

1. Measure *your* thumbnail, hand, and handspan.

Number of centimetres?

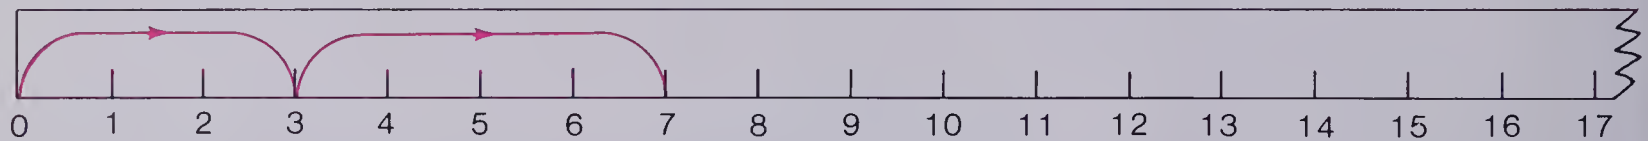

Use a *centimetre* ruler. Guess first. Then measure.

6. chalkboard eraser 7. pencil 8. book 9. shoe 10. chalk

Adding on Your Ruler

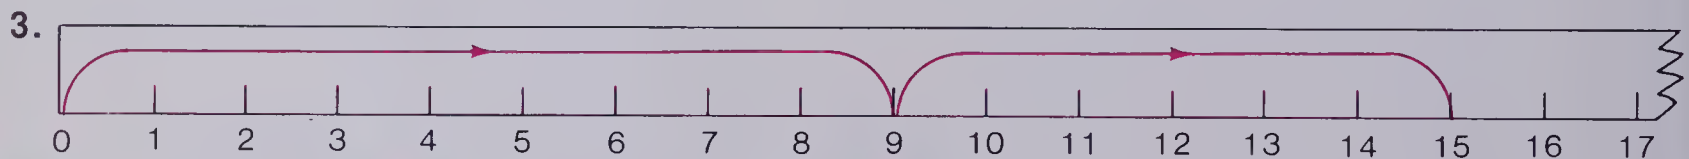

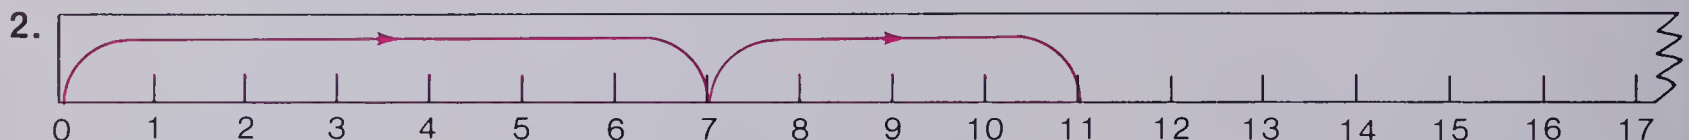

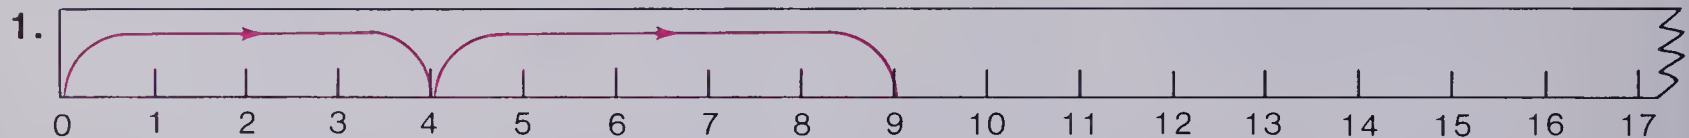

You can use your ruler to help you add.
Just follow the bouncing arrow.

You jump 3 spaces. "3" is the first addend.
You jump 4 more spaces. "4" is the second addend.
The sum is "7".

$$\begin{array}{r} 3 \\ + 4 \\ \hline 7 \end{array}$$

Write the number stories for these.

4. $4 + 6$

5. $8 + 7$

6. $2 + 10$

7. $5 + 8$

8. $11 + 6$

9. $3 + 9$

10. $1 + 5$

11. $13 + 4$

12. $9 + 4$

13. $7 + 7$

14. $5 + 9$

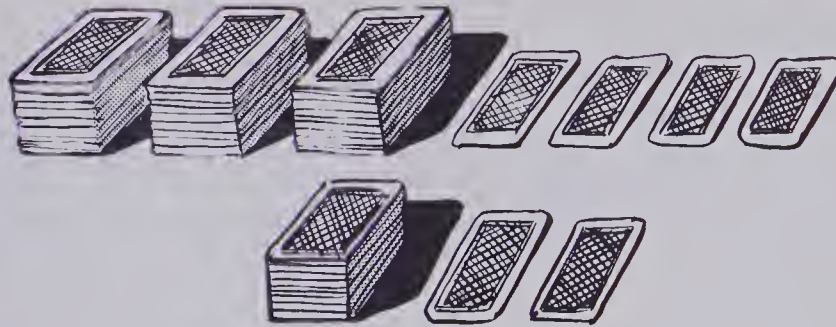

15. $2 + 14$

Adding Big Numbers

Kim has 34 cards.

Tom has 12 cards.

How many do *they* have?

$$\begin{array}{r} 34 \\ + 12 \\ \hline \end{array}$$

Add the numbers in the one's place.

	tens	ones	
	3	4	
+	1	2	
		6	$4 + 2 = 6$

Add the numbers in the ten's place.

	tens	ones	
	3	4	
+	1	2	
	4	6	$3 + 1 = 4$

What is the number?

1. Double the number in the ten's place to get the number in the hundred's place.
2. The number in the hundred's place is 7 more than the number in the one's place.

Adding Hundreds

Add $527 + 385$.

	hundreds	tens	ones
	5	¹ 2	7
+	3	8	5
			2

Add the numbers in the one's place.

$$7 + 5 = 12$$

$$12 = 1 \text{ ten and } 2 \text{ ones.}$$

Put the "2" in the one's place and move the 1 ten to the ten's place.

	hundreds	tens	ones
	¹ 5	12	7
+	3	8	5
		1	2

Now, add the numbers in the ten's place.

$$1 + 2 + 8 = 11$$

$$11 \text{ tens} = 1 \text{ hundred and } 1 \text{ ten.}$$

Put the "1" in the ten's place and move the 1 hundred to the hundred's place.

	hundreds	tens	ones
	¹ 15	12	7
+	3	8	5
	9	1	2

Now, add the numbers in the hundred's place.

$$1 + 5 + 3 = 9$$

$$9 \text{ hundreds.}$$

Put the "9" in the hundred's place.

This is what you did.

Subtracting on Your Ruler

You can use a ruler to help you subtract.
Just follow the bouncing arrow.
It will bounce back when you take away.

You jump “8” spaces.

8

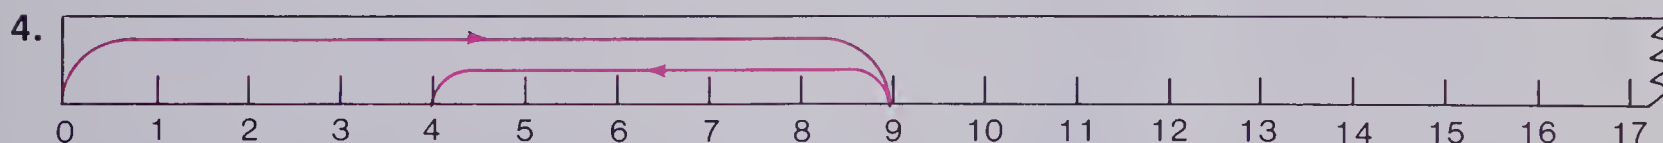

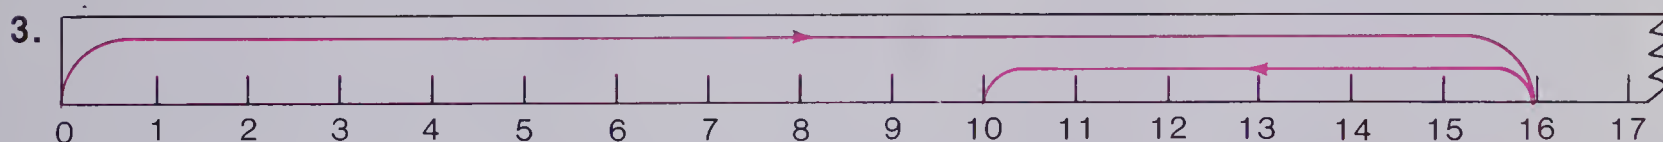

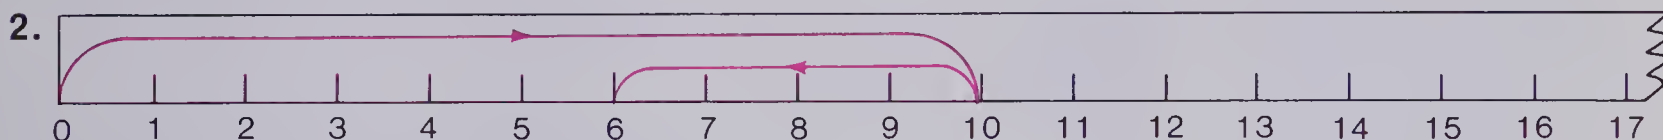

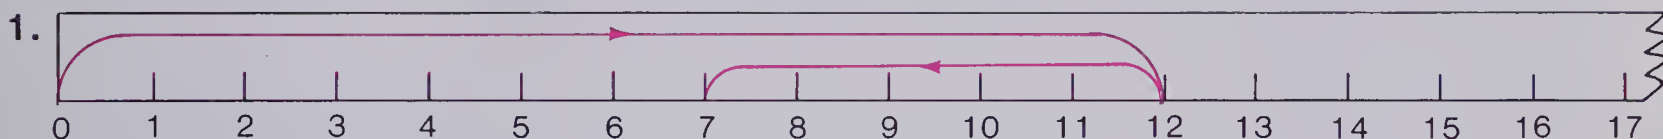

Now you jump back “3” spaces.

-3

$$8 - 3 = 5$$

The answer is “5”.

Write the “number stories” for these.

Subtract.

5. $8 - 5 = \blacksquare$

6. $9 - 6 = \blacksquare$

7. $10 - 2 = \blacksquare$

8. $7 - 4 = \blacksquare$

9. $5 - 3 = \blacksquare$

10. $10 - 6 = \blacksquare$

11. $8 - 2 = \blacksquare$

12. $4 - 3 = \blacksquare$

13. $17 - 4 = \blacksquare$

14. $15 - 4 = \blacksquare$

15. $16 - 3 = \blacksquare$

16. $15 - 2 = \blacksquare$

Subtracting

First, there were 14 balloons.

Then, 2 balloons broke.

Now there are 12 balloons.

$$\begin{array}{r} 14 \\ - 2 \\ \hline 12 \end{array}$$

$$\begin{array}{r} 1 \quad 4 \\ - \quad 2 \\ \hline \quad 2 \end{array}$$

First, subtract the numbers in the one's place.
 $4 - 2 = 2$
 Put the "2" under the line in the one's place.

$$\begin{array}{r} 1 \quad 4 \\ - \quad 2 \\ \hline 1 \quad 2 \end{array}$$

Now subtract the numbers in the ten's place.
 There is nothing to "take away" from 1.
 Write the "1" under the line in the ten's place.

Subtract. Remember to keep the numbers in their places.

Use your ruler to check Questions 1 through 5.

Subtracting Large Numbers

Susan counted 44 centimetre cubes.
Kevin took away 12 red centimetre cubes.
How many are left?

	tens	ones

$$4 - 2 = 2$$

Put the "2" in the one's place.

Now look at the ten's place.

Regrouping to Subtract

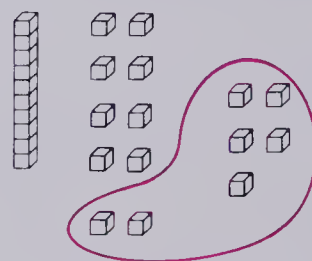

Subtract $25 - 7$.

Sometimes you have to do something special before you can subtract.

Subtract 7 blocks.

First you must break 1 ten into 10 ones and then subtract.

tens	ones
¹ 2	¹⁵ 5
-	7
	8

You have 5 ones.

Can you subtract 7 ones?

Regroup 1 ten \longrightarrow 10 ones.

10 ones + 5 ones = 15 ones.

$15 - 7 = 8$ ones.

tens	ones
¹ 2	¹⁵ 5
-	7
¹	8

So, $25 - 7 = 18$.

This is what you did.

$$\begin{array}{r} \text{ } 1 \text{ } 15 \\ 25 \\ - 7 \\ \hline 18 \end{array}$$

If you do not have enough ones to subtract, regroup and move 1 ten to the one's place.

More Regrouping

Subtract $53 - 17$.

	tens	ones
	⁴ 5	¹³ 3
-	1	7
		6

You have 3 ones.

Can you subtract 7 ones?

Regroup 1 ten \longrightarrow 10 ones.

$10 \text{ ones} + 3 \text{ ones} = 13 \text{ ones.}$

$13 - 7 = 6 \text{ ones.}$

	tens	ones
	⁴ 5	¹³ 3
-	1	7
	3	6

Now subtract in the ten's place.

$4 - 1 = 3.$

So $53 - 17 = 36.$

Subtracting in the Hundreds

Subtract $456 - 124$.

	hundreds	tens	ones
	4	5	6
-	1	2	4
			2

First, subtract in the one's place.

$$6 - 4 = 2.$$

	hundreds	tens	ones
	4	5	6
-	1	2	4
		3	2

Next, subtract in the ten's place.

$$5 - 2 = 3.$$

	hundreds	tens	ones
	4	5	6
-	1	2	4
	3	3	2

Now, subtract in the hundred's place.

$$4 - 1 = 3.$$

This is what you did.

The Mystery Machine

This is a mystery machine.
Strange things happen inside.

What happened inside the machine?

What would come out if:

1. A “twoble” went in?

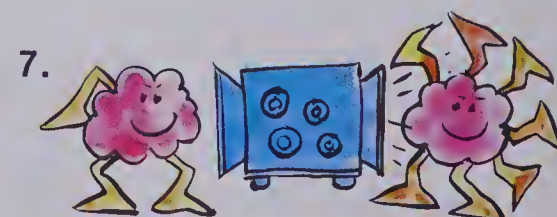

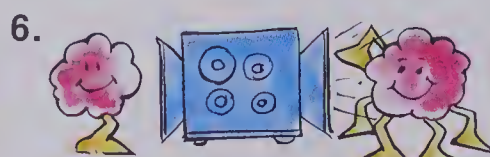

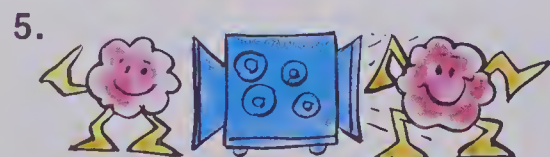

2. A “fourble” went in?

3. A “oneble” went in?

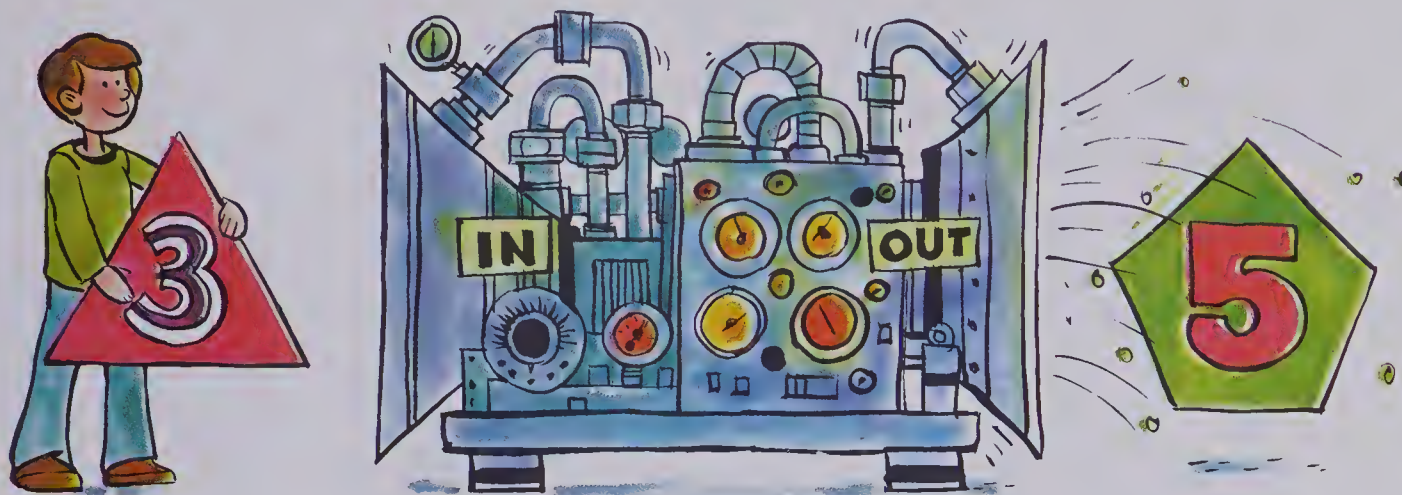

4. Now change what happens inside the machine so that it is an “add 9” machine.
What comes out now?

Tell what happens.

The Mystery Machine Changes Numbers

What number came out of the machine?

What happened to the “3” inside the machine?
